Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Attorney Collins first clarified that there is one more species of the priming composition, a viral vector, that was omitted in the Restriction Requirement.

Attorney Collins further stated that claim 5 is a genus claim containing multiple sequences and inquired whether the election of a single sequence is necessary. Supervisory Examiner Housel replied that the sequence election is a proper starting point in the prosecution and if the elected sequence is found allowable, the genus claim will be examined.
